FOR IMMEDIATE RELEASE

MEDICAL IMAGING AND ARCHIVAL PRODUCTS FROM ESSENTIAL ENTERPRISE SOLUTIONS, INC. NOW AVAILABLE THROUGH WMI

Salisbury, NH -- November 18, 2009 -- In our continuing effort to expand our digital offerings, White Mountain Imaging is pleased to announce that we will now distribute the Essential Enterprise Solutions, Inc. (EESi) product portfolio. EESi offers a variety of affordable, yet powerful, medical imaging and archival solutions designed to fit the needs of practices of all sizes. Backed by professionals with over a century of combined experience in software and hardware design and development, EESi's comprehensive product portfolio includes PACS Archive Servers, EMR Bridge, Tech Workstations, Web Viewer, and Medical Disc Publishers.

PACS ARCHIVE SERVERS

The PACS Archive Servers from EESi provide a reliable and efficient solution for accessing, storing and distributing digital radiology images from various modalities. These powerful, standards-based PACS Archive Server platforms offer healthcare professionals the utmost in scalability and flexibility by readily adapting to the size and workflow of any facility. All EESi PACS Archive servers include an HL7 interface for EMR/EHR, HIS/RIS integration, Modality Work List server, Unlimited AE titles, Smart DICOM Routing (with programmable delayed send) and On Line Storage expandability.

EMR BRIDGE

The server-based EMR Bridge from EESi enables seamless integration between EMR systems and virtually any PACS for a complete, integrated and discrete view of patient DICOM images directly on the EMR workstation.

TECH WORKSTATION

Available with 21.5" or 27" displays, the Tech Workstations from EESi deliver ultrafast performance, an intuitive interactive user interface and an innovative technique for the navigation and visualization of multi-modality and multi-dimensional images. These fully DICOM-compliant workstations integrate easily with existing systems or can be used stand-alone.

FOR IMMEDIATE RELEASE

WEB VIEWER

With the EESi Web Viewer, medical professionals can securely retrieve, display and perform advanced image processing operations on DICOM medical images created by a variety of modalities from virtually any Internet-enabled device.

MEDICAL DISC PUBLISHERS

These fully automatic disc recording systems comply with industry standards and give medical professionals a reliable and economical solution for recording patient studies onto CD and DVD media. Images can be recorded directly from a PACS archive, DICOM modality or DICOM workstation and prints a custom CD/DVD label with selectable patient demographics and graphics.

EESi's products will be on display in WMI booth 3009 at this year's RSNA at McCormick Place in Chicago, Illinois from November 29th thru December 4th. This year WMI will also exhibiting significant new products in WMI booth 3061. Both WMI Booths are located in the South Hall. Please make a point to stop by each booth.
